

Agenda - Week 8

Settling matters

Location: PC Hall 1 - Cubicle 2

Datum: 4th April 2023

Time: 15:15 - 15:40

Attendees:

- Ísak Jónsson (Minute-taker)
- Martin Angelov (Chairman)
- Max Derbenwick
- Cristiana Cotoi
- Miia Zhang
- Satsuki Udagawa

Agenda-items

15:15 - 15:17 **Opening by chair (Approval of agenda & minutes)**

15:17 - 15:27 **Demo the application for TA, TA takes over**

Fullscreen app?

Task colors are annoying

“It is working” - Joris

Application froze, too many instances (user error)

Numbers are fine in the progress bar

“I love it” - Joris

Uncomment code.

Add javadoc where possible if we have time.

15:27 - 15:32 **Discuss application with TA, feedback on what needs to be finalized**

Grading based on product pitch + running project.

Product pitch used as a guideline in how to use the app.

Going through the backlog and checking off boxes.

Look for polish, not bugs. No stress testing.

Polish -> intuitive, performance, refresh speed?

Will be running two clients, final debug can focus on this.

Meet learning objectives -> check this on course description site.

Oral presentation -> examiner + TA, ask general questions about learning objectives, or technology, or implementation details.

Oral exam -> tight schedule, will be posted somewhere. Might not be on Tuesday.

Product pitch must be exactly 10 min or less.

15:32 - 15:35

Feedback, questions, summarize action points, and closure.

Friday -> Buddycheck, use AID, will be checked. On brightspace

Friday -> last chance to complain about a teammate.

Friday -> Self reflection, remember word count, reference teamwork lecture

Tonight -> Git inspector last run, might be sent to us.
